

Callistemon Mr Foster

Red Bottle Brush

2m x 2m

3.3l

Callistemon pachyphyllus (Wallum Bottlebrush)

3.5 litre pot

Dense straggling shrub to 1.5 m high. The flowers are usually crimson but sometimes greenish-yellow.

Leaves narrow-oblongate, 4.5–9 cm long, 3–9 mm wide, apex abruptly narrowed and mucronate; lamina thick, leathery, grey-green with prominent midrib and intramarginal veins.

Spikes 5–10 cm long, 50–60 mm diam. Filaments c. 25 mm long, rich crimson or rarely yellowish green. Capsules c. 6 mm diam., apex constricted. It is a hardy plant that grows well in poorly drained soil in full sun.

Erica Cerinthoides Red

2.5l

Scarlet Blooms

A small shrub with dark-green, needle-like foliage covering the stems. Each stem is topped with a cluster of stunning red flowers. Cut back stems after flowering to maintain shape. Prefers a warm, sunny site in the garden but will tolerate light frosts. Well drained soil. Eventual height 1m

1 metre x 1 metre

Erica Peziza Velvet Bells – White ‘Velvet Bell Heath’

1.5litre pot

Eucalyptus Leucoxyton Rosea seconds only

3l

Red flowers

Grevillea Royal Mantle **1.5litre pot**

A vigorous and hardy groundcover suitable for areas requiring quick coverage. Deep pink/red flowers for most of the year. Will establish better with good weed control or weed mat protection from invasion.

H: Prostrate. F: Majority of year. Frost hardy. Attracts birds.

Lorapetalum Fire dance **(2.5litre)**

2.5litre pot

Lorapetalum Razzleberry

An attractive small rounded semi weeping plant bearing masses of lolly pink flowers late summer-autumn. New growth has a rich plum coloured hue. Excellent for planting in mass. Adaptable to a wide range of soils and conditions.

H: 1metre

Phormium Black Rage (dwarf flax)

Native dwarf flax. Bold and dramatic. Frost tolerant. Sun or part shade. Versatile as a border, mass planted, or around pool. Well drained soil. Can handle extended dry.

Height: 1.2m

Grevillea Banksii Forsterii

3.3 litre pot

Grevillea Robusta

Tall erect tree bearing masses of orange/yellow flowers.

Can be quick growing in ideal situations.

Prefers free draining soils in warm situation in full sun.

Height: 5 metres

Callistemon pallidus

Lemon Bottle-brush

2.5m x 2.5m

PB6.5 bag

Grevillea Bronze Rambler (1.5litre pot)

Vigorous prostrate groundcover spreading up to 2-3 metres with attractive bronze leaves and wine red toothbrush flowers all year with a mass display in Spring.

H: prostrate. F: Spring. Frost hardy. Attracts birds.

Eucalyptus Baby Blue – ‘2nds’

Eucalyptus Baby Blue – ‘2nds’

These are NOT 1sts but 2nds – they are going to grow and make good plants but currently they are ‘unshapely’. They currently do not look all over like the picture. Call in at the nursery to view.

A select form of the Silver Dollar Gum noted for its smaller

round blue- green leaves and more compact growth habit. Useful for picking. Suited to most soils and situations in full sun.

H: 3m (although many gardeners use the branches for foliage and keep the plant lower).

Banksia Carnavon Gold – Only seconds available

2.5l pot

Slow-growing shrub, height 4m x width 2m, with gold and black brushes which are highly attractive to honeyeaters

Rhodocoma Arida (Grass)

A tidy erect plant. Well drained soils. Full sun or light shade. An attractive feature plant for dry areas.

Height: 1.6m

Wisteria Lavendula Lace – Vigorous climber

Vigorous climber. Pale lavender and white flowers. Sweet scent. Great on walls, fences, trellises or pergolas. Drought tolerant.

Leptospermum Dark Night (a bit Purple)

An attractive selection with very deep mauve-purple flowers. Flowers smother the plant in Spring. Suited to most soil types in full sun. Would make an attractive screen plant. Trim back after flowering to shape and size.

Height: 1.5metres

Grevillea Barklyana (1.5litre pot)

A tall erect quick growing rounded shrub with large deeply cut leaves. Red tooth brush like flowers are prominent winter-spring. Suited to well drained soils in full sun.

Height: 3m. Frost Resistant.

Banksia Ericafolia 'Heath Banksia'

Heath Banksia Bushy large shrub with large golden brown fls in Autumn- Winter which attracts nectar feeding birds. Ideally suited to an open sunny situation. Adaptable to many soil types. Responds well to pruning to maintain shape and size.

Height: 2m

Grevillea Tangerine Dream – 2nds only!

2.5l pot

Please allow enough for courier and plant/s.

Wedding Bouquet (not available – display only)

An example bouquet.

Grevillea Robin Hood 1.5litre pot

1.5litre pot

Ozothamnus Winter White 'Rice flower'

A select form of the Rice Flower. Has an erect growth habit terminating in large clusters of rice like flowers which are snow white. Flowering can be almost all year round with peak flowering in Winter/Spring. Best in full sun in a free draining acidic soil. Flowers are ideal for cutflower or can be dried. Prune when flowering is complete to enhance next flowering. Can be a container plant. Attracts bees. Tolerates light frost

Height: 1.5m

Callistemon viridiflorus – great seconds!

An upright evergreen shrub which bears cream/green bottlebrush flowers late spring and summer. It is a reasonably hardy frost tolerant plant. Soils should be light to medium moist but well drained. Prune to shape and size.

Height: 2m

Callistemon Red Clusters – 2nds only!

Vigorous large shrub, new leaves emerge a silvery-pink turning to mid- green. Masses of red bottlebrush flowers with gold anthers appear in terminal clusters in spring and autumn. Tolerant of poor dry soils, though prefers some moisture. Provides nectar for bees and birds. Good for hedging. Grows in most soil types including sandy soils. Well drained it prefers even moisture but tolerates dry soils. Sun or semi-shade. Useful coastal or exposed sites. Tolerates some frost.

Height: 3m

Callistemon John Mashlan

A compact upright bush producing masses of candy floss pink bottlebrush flowers during Spring/Summer. Hardy and tolerant of dry situations once established. Best in full sun in well drained soils.

Height: 2m

Callistemon Hot Pink

3.3litre pot

Callistemon Citrinus- 2nds available

3.3litre pot

Garden Venue Hire – For Wedding Photos

See our gallery of photos fro Matakana Sculptural Habitat aka The Secret Garden

Banksia Orange Candles – lovely healthy plants!

A Banksia ericafolia hybrid with erect growth habit. Flower buds are lemon yellow opening to orange gold flowers. Flower cones up to 30cm long. Flowers from spring to early summer. Bird attracting. Suited to most well drained soils.

Height: 2m

Grevillea Eureka – lovely smaller bush.

A striking new hybrid Grevillea it develops into a fully foliated plant to the ground and when in full flower, has gold clusters of flowers more or less from every terminal growth. Flowering is prolonged from Autumn to Spring. Frost hardy to minus 3 degrees C once established.

Adaptable to most well drained soils in an open sunny situation. Plants can be trimmed in late spring to shape if required.

An excellent plant for open sunny situations. Bird attracting. Is quite at home in coastal situations.

H 75cm x W 1m

(We have a few good 2nds grade Grevillea Eureka Plants- let me know if you would like these at \$25 each)

Callistemon Little John

red flowers, small bush

Excellent compact growing plant. Useful in landscaping in rock gardens, borders, patios, and tubs. Clusters of deep red bottle brush flowers appear throughout the year. Hardy,

prefers full sun in well drained soils.

Height: 75cm

Leptospermum Outrageous (large pot size 6 litres)

New Release. A stunning upright Leptospermum which smothers itself in masses of deep red flowers in mid-late Spring. Suited to most soil types in full sun. Would make an attractive screen plant. Trim back after flowering to shape and size.

Height: 1.8m

Metrosideros K. Variegata – Red flowers!

3.3 litre pot/bag

Callistemon v. Genoa Glory

3.3 litre pot/bag

Ispogon Anethifolius – yellow flower – ‘Drumstick’

‘Narrow-leaf drumsticks’. Evergreen shrub, leaves are leathery and flowers cone-like. Upright shrub to 2m tall with narrow, needle-like, divided leaves less than 1mm in diameter borne on reddish stems. Globular yellow flowerheads up to 4cm in diameter comprising individual flowers arranged in a spiral pattern are borne in spring and early summer and are followed by grey cones. Prefers full sun or partial shade. Most acidic soil types. Well drained. Useful wall-side borders, low maintenance city and courtyard gardens.

Height: 2m Width: 1m. Medium hardy.

Grevillea Bon Accord – bushy plants!

large flame red flower spikes

Forms a bushy shrub with large flame red flower spikes on the ends of the branches in late Winter through Spring. Its slow rather dense growth habit makes it a useful plant for a hedge. Likes full sun in free draining soils.

H 1.5m

Banksia Baxterii – seconds only are available.

2.5 litre pot (*available after Covid-19 Lockdown*)
