

Ispogon Anethifolius – yellow flower – ‘Drumstick’

‘Narrow-leaf drumsticks’. Evergreen shrub, leaves are leathery and flowers cone-like. Upright shrub to 2m tall with narrow, needle-like, divided leaves less than 1mm in diameter borne on reddish stems. Globular yellow flowerheads up to 4cm in diameter comprising individual flowers arranged in a spiral pattern are borne in spring and early summer and are followed by grey cones. Prefers full sun or partial shade. Most acidic soil types. Well drained. Useful wall-side borders, low maintenance city and courtyard gardens.

Height: 2m Width: 1m. Medium hardy.

Grevillea Bon Accord – bushy plants!

large flame red flower spikes

Forms a bushy shrub with large flame red flower spikes on the ends of the branches in late Winter through Spring. Its slow rather dense growth habit makes it a useful plant for a hedge. Likes full sun in free draining soils.

H 1.5m
